DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Quioc, et al. (2006/0043716).

Quioc discloses a gas generator comprising a housing having oppositely disposed first and second ends 12a, 12b, adjacent the first end, the housing at least in part defining a first chamber 42 containing a quantity of ignition material 44 and, adjacent the second end, the housing at least in part defining a second chamber 70 containing a quantity of gas generant material 50; and an initiator 52 operatively associated with the first chamber and in reaction initiating communication with at least a portion of the quantity of ignition material, the initiator, upon actuation, to initiate reaction of at least a portion of the quantity of ignition material to form ignition products; wherein the second chamber 70 includes at least one container 22 wherein at least a portion of the quantity of gas generant material is contained, the container having a perforated side wall and oppositely disposed first and second end walls, with the first end wall perforated and disposed adjacent the first chamber to allow communication of at least a portion of the ignition products therethrough and into contact with gas generant material therein contained to ignite the gas generant material to produce a product gas and with the second end

Art Unit: 3616

wall perforated to allow gas flow communication of the product gas therethrough for discharge from the gas generator, as shown in figure 1. The second chamber 70 includes a plurality of the containers. At least one container 22 comprises a cylindrical tube. The first chamber is in tablet form. The gas generant 50 material within the at least one container is in wafer form. The gas generant material within the at least one container comprises a plurality of wafers.

Allowable Subject Matter

3. Claims 13-14 are allowed.
4. Claims 7-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
